EXPERIENCE

Developer – Application and Cloud Specialist | Procellis Technology, Inc. 01/2023 – Current

- Led team of 2, developed a web application using Flask, Jinja2, jQuery and REST API to cut down 50% ticket creation time, increased management efficiency.
- Researched and developed cloud practice in AWS, identified 3 main cloud services of the company
- Built CI/CD pipeline with AWS and Jenkins, enhancing productivity and accelerating testing and delivery

Software Intern | Procellis Technology, Inc. 05/2021 – 12/2022

- Led a team of 3, developed web dashboard using Dash, MongoDB, Panda, Docker and multithreading to asynchronously update information, reduced 70% time in generating business reports and monitoring KPIs.
- Led a team of 3, developed mobile applications using Flutter, SQLite, AWS Cognito to boost internal productivity
- Utilized MVVM pattern, reviewed, debugged, tested and merged codes to the main codebase.
- Researched and proposed 2 solutions to automate tasks, documented tutorials to reduce training time by 20%

EDUCATION

Metropolitan State University, Bachelor of Science in Computer Science (Graduated Dec 2022) GPA: 4.0

Accomplishments: Dean's Lists, Academy of Math and Science Scholarship,

PROJECTS

To-do List | React Native, JavaScripts, Hooks React, AsyncStorage [Github](#)

- Led a team of 7 people, built a To-do List application using React Native, JavaScripts and AsyncStorage
- Organized SCRUM meetings, reviewed progress and sprints, helped teammates understand new code changes, reviewed, revised and coordinated codes.
- Gathered idea and contributed in designing the application UI using Figma

Wordle Telugu | PHP, HTML, CSS, Bootstrap, JavaScripts, MySQL [Github](#)

- Contributed to the open-source, non-profit Wordle Telugu project by adding 10 new features to the game such as importing words, exporting reports, caching previous games in the browser and share screenshots of the game when the players win.
- Led a team of 5, reviewed, debugged and collaborated codes into the same code base.
- Refactored codes, extracted methods and constants to remove 80% of duplicated codes and potential bugs.

Shelter Tracker | Java, MySQL, JavaFX, Android [Github](#)

- Developed an Object-oriented desktop and mobile app to track animal shelter, allow parsing JSON and XML files
- Led a team of 4, organized codes using Layer Architecture and Data Mapper ORM
- Refactored codes using Polymorphism Responsibility Pattern, Singleton pattern, replaced constructor with Factory method to enable low coupling.

Bordergore websites | Python, Selenium, Bootstrap

- Added new features to scrape latest news from Australia CNN using Selenium and Python, created Unit tests and test cases to ensure proper implementation of functions and classes

Weather App | Kotlin, Rest API, Hilt, Jetpack Compose, Rest API [Github](#)

- Developed an Android application that displays the weather for user's current location by fetching real-time data from Open Weather API

SKILLS

- Programming: Python, Java, C, C++, Dart, JavaScript, PHP, Swift, R, Kotlin
- Framework/ Library: React Native, Flutter, jQuery, Bootstrap, Jinja2, Dash, Flask, HTML, CSS, Panda, Numpy
- Database: SQLite, MySQL, MongoDB, MariaDB
- Web Services: AWS Cognito, AWS DynamoDB, AWS EC2, AWS VPC, Docker, Jenkins, Rest API

AWARDS AND CERTIFICATIONS

- Certificate: Cisco DevNet Specialist, Cisco DevNet Associate, Cisco IoT, AWS Cloud Practitioner
- Award: Won the ticket to Google Code Jam to I/O for Women 2020, 2nd prize in Vietnam National OI 2012
